and my pass subjects I have been ill for the last two weeks. Although I have attended the lectures I have not been able to do any work outside of school hours. This extra work means that I have nine hours more lectures a week than I should have. As a result of this my course has become so difficult that if I try to keep up my work I will injure my health, and if I do not keep up the work will fail on my examinations and have to discontinue my university course. Hoping that you will be able to get me exempted from this extra work I remain,

Yours truly,
C. H. McLeod.

Toronto, November, 24th, 1917.

Sir Robert A. Falconer,
President University of Toronto,
Toronto.

Dear Sir;-

As I am a student at the University of Toronto and feel that I have not been fairly treated in regards to my Honour Matriculation certificate I decided to write this letter to you to see if you could help me.

Last may there was an appeal made to the High School boys to aid the

Education and we went to work for different farmers who needed help.

At the opening of the University in September I registered in the First Year Honour Science course in University College. Two weeks later I was informed that I would have to take all of my last years work over again besides my honour subjects. I spoke to Mr. F.C. Jeanneret about it and he said it would be a disgrace if I had to take the work over but he was unable to help me.

As a result of trying to keep up my honour subjects

farmers in greater production. The Department of Education informed us that we would be granted the same standing, if we went on the farm for three months, as those who passed their examination in June. Mr. C.B. Sissons of Victoria College addressed the pupils of our school and appealed to us to answer the called of increased production. Early in May seven boys besides myself in attendance at the Collingwood Collegiate Institute were given an examination by our teachers. All those who passed this examination were given their standing by the Department of

Toronto.

Dear Mr. McLeod:

I have gone over your case with the Registrar and I have asked him to have it re-considered by the Council's Committee. This was done but they were of opinion that they could not recommend that you should be granted the pass subjects of the first year. The case, however, is to be taken up again this afternoon by another committee, though I am doubtful whether they will be able to reverse their decision. Several others are involved in the matter. As I understand it your Principal's certificate was accepted as allowing you to enter upon an honours' course and you are not required to attend the pass classes, but only to take the examinations of the pass subjects. May it not be that the honours' course in any case is somewhat too heavy for you ? Certainly I would advise you not to injure your health in attempting too much. It would be far better to have a good general course degree than to get an honours' course degree and have your health suffer.

I am, Yours sincerely,

President.
